🔗 jehanusama 📁 Portfolio

Profile

Front-End Engineer with hands-on experience developing modern web applications using React.js, Next.js, TypeScript, Redux Toolkit, and RTK Query. Skilled in building scalable, responsive, and maintainable front-end solutions, integrating RESTful APIs, and optimizing application performance. Passionate about creating intuitive user experiences through clean architecture, reusable components, and best development practices while collaborating effectively in Agile teams.

Professional Experience

EyeGo.Ai 06/2026 – Present
Front-End Engineer

- Developed and maintained scalable dashboard features and responsive user interfaces.
- Implemented complex application workflows, advanced filtering, and interactive data visualization.
- Integrated RESTful APIs and managed application state using **Redux Toolkit** and **RTK Query**.
- Optimized application performance, usability, and overall user experience.
- Built reporting, data export, and charting functionalities while ensuring responsive design across devices.
- Collaborated with backend developers, QA engineers, and designers in an Agile development environment.
- Mentored and guided new interns through project onboarding, architecture, and development workflows, while assigning tasks and providing ongoing technical support.

EyeGo.Ai 03/2026 – 06/2026
Front-End Engineer Intern

- Developed and maintained dashboard features using **React.js**, **Next.js**, **TypeScript**, **Redux Toolkit**, and **RTK Query**.
- Integrated REST APIs and implemented responsive, reusable UI components.
- Fixed UI/UX issues and collaborated with backend and QA teams to deliver production-ready features.
- Participated in code reviews, testing, and debugging to improve application quality and performance.

Information Technology Institute (ITI) 07/2025 – 12/2025
Intensive Training Program (ITP)
UI UX Development Track

- Developed interactive and responsive user interfaces for various web projects using HTML5, CSS3, and JavaScript.
- Collaborated with cross-functional teams to translate design mockups into functional, pixel-perfect code, ensuring cross-browser compatibility.
- Applied user-centered design principles to enhance usability and user experience through iterative testing and refinement.

Digital Egyptian Pioneer Initiative (DEPI) 10/2024 – 04/2025
Front-end Development Track

- Built dynamic, single-page applications (SPAs) using the Angular framework, utilizing components, services, and routing.
- Integrated RESTful APIs to fetch and display data efficiently, handling asynchronous operations and state management.
- Gained practical experience in version control using Git and GitHub for collaborative development and project management.

Projects

Stockly – POS & Inventory Analytics

08/2026 – 09/2026

React 19 · Supabase · Recharts · Tailwind CSS

- Engineered a full-stack POS and inventory management system with real-time Supabase database sync
- Implemented live cart profit-margin calculation and proportional discount allocation logic across order line-items
- Built interactive analytics dashboards tracking net profit across products, categories, and customer leaderboards

Analytics Dashboard Application

03/2026 – 04/2026

Next.js · TypeScript · Redux Toolkit · Recharts

- Built a responsive analytics dashboard with Redux Toolkit-based centralized state architecture.
- Implemented advanced filtering, sorting, and pagination optimized for large datasets
- Developed dynamic PDF and Excel export pipelines using jsPDF and xlsx
- Dockerized the application for production deployment

Pyramis – Travel & Booking Platform

12/2025 – 01/2026

Vue 3 · Pinia · Stripe · SignalR

- Engineered a multi-service booking system covering hotels, cars, trips, and attractions using a centralized Pinia store architecture.
- Integrated Stripe payments across four separate checkout pipelines.
- Built a real-time customer support chat with Microsoft SignalR, featuring automatic reconnect and REST API fallback.
- Built an AI-powered trip planner rendering personalized multi-day itineraries with an interactive Leaflet map.

Education

Bachelor of Engineering

09/2019 – 06/2024

Faculty of Engineering, Tanta University.

- Major : Electronics & Communication Engineering
- Graduation Percentage:83.13% (With Honors)
- Graduation Project: Design of EEG Controlled Wheelchair System (Sponsored by Itida)
- Grade: Excellent
- Description: Designed and implemented a prototype wheelchair controlled by brain signals using Eyeblink and Neurosky technology, demonstrating strong problem-solving and technical integration skills.

Skills

Front-End: HTML5, CSS3, SCSS | JavaScript (ES6+), TypeScript | Bootstrap, Tailwind CSS | Vue.js, React.js, Next.js, Angular | Redux Toolkit, RTK Query

UI / UX: User Research, Interaction Design | Wireframing, Prototyping, User Flows | Figma (Advanced), Adobe XD

Tools & Version Control: Git, GitHub, VS Code, Docker, Postman | Adobe Photoshop, Illustrator

Language Skills

Arabic

Native

English

Intermediate
